PORTFOLIO STATISTICS

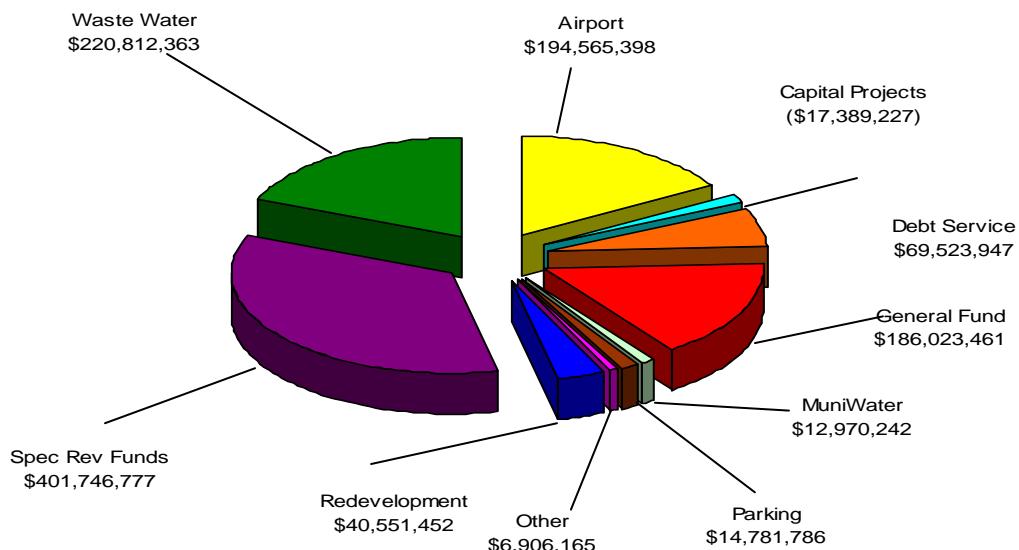

The graphs below provide snapshots of the City's total investment portfolio as of August 31, 2007. The total portfolio size was \$1,094,400,255.27. The first graph shows the portfolio composition by investment type and the second two graphs show the portfolio's cash balances by fund type.

Portfolio Composition

The graph below reflects the reconciliation of total balances reported by the investment program's investment accounting system compared to the City's Financial Management System (FMS).

Deposit-in-Transit, Outstanding Checks *	<u>\$36,092,109</u>

Cash Balance Total	\$1,130,492,364
--------------------	-----------------

*Reflects timing differences between when deposits are made and accounting for proceeds in FMS or when checks are written and not yet cashed by the receiving party.

The graph below compares the monthly total balances of selected City funds as reported by FMS.

Monthly Comparison of Balances by Fund Type

Note: The Capital Projects fund balance remained below zero this month due to the timing of reimbursements from various bond funds held by trustees. A time lag between payments made through the investment pool, and receipt of funds for the related reimbursement for these capital costs from trustees resulted in the negative balance. Finance is working with departments to shorten the time lag between capital project expenditures processed through the pooled investment portfolio by capital project managers and reimbursement requests. The City received approximately \$26 million in reimbursements in the first week of September from bond funds held by trustees.

Attached to this report are the following reports, providing more detailed information on the portfolio statistics as of August 31, 2007:

- Investment Inventory with Market Value, showing classifications of investments by issuer, maturity date, par amount and dollar amount invested.
- Purchase activity with each investment broker during the month of August.
- Earnings associated with investment held during the month of August.

INVESTMENT STRATEGY

Due to mixed economic data fueling the uncertainty of economic growth and direction of interest rates, investors continued to maintain a shorter investment horizon as the yield curve remained inverted during August (market yields in the mid-to long-range were lower than shorter-term investments). During the summer months the City's investment strategy regarding any maturing investments and income the City receives are used for liquidity purposes to cover cashflow needs. Therefore, investments are limited to short term securities.

PORTFOLIO PERFORMANCE

Comparison of Portfolio Investment Earnings to FY 2007-08 Budget

Below is a comparison of actual investment earnings on an accrual basis to the fiscal year 2007-08 budget. Monthly budgeted earnings apportionments for the City funds are based upon historical cash balance averages and an assumed average interest rate yield of 4.40% for the fiscal year. As reported in the Notes to the General Purpose Financial Statements in the City's Comprehensive Annual Financial Report (CAFR), annual budgets are not prepared for some funds (for example, Nonexpendable Trust Funds, Repair and Demolition Fund, etc). The City's budgets for the General Fund, Special Funds and Capital Improvement Programs reflect annualized investment income earnings of \$27.3 million. The following schedule reflects the net investment earnings of only the budgeted City funds participating in investment portfolio fund 1.

The Redevelopment Agency projects annualized investment income earnings of \$3.55 million for Fiscal Year 2007-08. This represents interest earned on the Agency's funds participating in the City's investment program and is exclusive of interest earned on funds held in escrow or by fiscal agents and on developers' loans¹. The amounts shown for the Redevelopment Agency's monthly and fiscal year-to-date budgeted investment earnings are based on the Agency's annual budget for its participation in the City's investment program, apportioned on a pro-rata basis for the month and year-to-date, respectively.

¹ For the Agency's total budgeted investment income earnings for Fiscal Year 2007-08, please refer to its proposed budget at <http://www.sjredevelopment.org/Finance/financialinfo.htm>

(1) Note: Reflects net investment yield which is calculated based on the earned interest yield less costs to administer the investment program and adjustment for funds with negative cash balances at month end.

Yield and Maturity Trend

The following graph provides the historical monthly dollar-weighted average days to maturity of the portfolio for each month for the past two years (bar graph) along with the yield trend in Portfolio 1 (line graph). The average days to maturity increased slightly during the month of August. Due to the need for cash during the summer months, any maturities or income was rolled into LAIF or Commercial Paper in order to have necessary liquidity to cover current or upcoming cash flows.

Benchmark Comparison

The following graph compares the earned interest yield of the City's Portfolio Fund 1 with the monthly average yields for the same period of the State of California Local Agency Investment Fund (LAIF) and of the two-year U.S. Government Agency securities from August 2005 through August 2007. The City's Total Portfolio is not used for benchmarking comparisons since it includes City-held bond funds, which have different cash flow needs than Fund 1.

Subject: August 2007 Investment Report

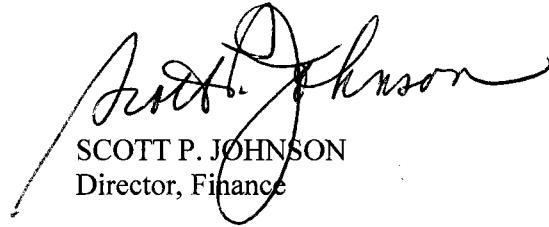

Page 7

The two-year US Government Agency securities are the closest suitable benchmark for the City's portfolio Fund 1 since the weighted average maturity for the portfolio is 614 days. The City is slightly trailing the performance of the two-year agencies mainly because several of the securities in the portfolio were purchased four or five years ago at lower interest rates than the rates in the current market.

The Portfolio Fund 1 performance trails the performance of LAIF given that LAIF's average days to maturity is 180 days. With the continuation of the market's inverted yield curve, LAIF is in a position to take advantage of the higher short-term rates but conversely will react more quickly as interest rates fall or as the yield curve readjusts to its "normal" upward sloping curve. The City's longer days to maturity results in the City taking a longer period of time to realize the benefits of higher short-term rates. Over time, a laddered portfolio will outperform a non-laddered portfolio where managers try to capture short-term interest rate hikes.

COMPLIANCE REPORTING REQUIREMENTS

There were no exceptions or violations outstanding for the month ended August 31, 2007. The investment portfolio meets the requirements of the City's Investment Policy and the California Government Code section 53601.
